DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to a game, classified in class 273, subclass 430.
 - II. Claims 25-29, drawn to a method of providing a game (i.e., an apparatus), classified in class 463, subclass 9.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the game may be played without an apparatus – i.e., by someone asking trivial questions to passersby.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Should Applicant elect Group II, this application contains claims directed to the following patentably distinct species of the claimed invention:
 - a. Using cellular phone. (Claim 28)
 - b. Using a wireless pda. (Claim 29)
 - c. Using an Internet-connected computer. (Claim 30)
 - d. Using a pay telephone. (Claim 31)
 - e. Using a web browser. (Claim 32)

Art Unit: 3714

- f. Using an Internet appliance. (Claims 33 & 34)
 - g. Using a chat room. (Claim 35)
 - h. Using an interface to determine a viability of dating (i.e., a dating service).
(Claim 36)
 - i. Using an advertising profile. (Claim 37)
 - j. Providing the clue free. (Claim 38)
 - k. Charging for the clue. (Claim 39)
6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 25-27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3714

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corbett B. Coburn whose telephone number is (571) 272-4447. The examiner can normally be reached on 8-5:30, Monday-Friday, alternate Fridays off.
